

GAS OPERATIONS

COMPRESSOR TECHNICIAN "B"

Nature and Scope of the Position:

Performs skilled duties as related to compressor stations. Identifies problems and initiates corrective action. Will be given individual assignments or work as a part of a crew. Work to increase job knowledge and skills progressing to the classification of Gas Operations Compressor Technician "A". Works under the direction of other classifications and/or the supervision of a supervisor. Will lead, direct, assign, and instruct lower classification personnel.

Typical Duties:

1. Overhaul compressors and auxiliary equipment.
2. Installs and maintains control systems that automatically start, stop, and monitor compressor station equipment from the interface with the controller to the controlled process.
3. Directs compliance with safety and standard operating procedures (S. O. P.) etc. and maintains good housekeeping practices.
4. Inspects and makes adjustments to ignition systems, fuel systems, engine control panels, and other technical systems, etc. Makes inspections of all compressor units and auxiliary equipment for correct adjustment and proper mechanical condition. Makes necessary adjustments to the equipment to ensure the safe, efficient operation of compressor station facilities.
5. Monitors and evaluates the condition of facilities, identifies problems, and initiates and communicates the necessary corrective action.
6. Prepares and maintains necessary paperwork and or computer-generated forms in the performance of assigned job duties.
7. Installs and maintains all controls, controllers, and instrumentation. Reads schematics and ladder diagrams and follows a sequential process of troubleshooting and diagnosing instrument faults.
8. Meets and confers with equipment Manufacturers' service representatives to diagnose equipment problems and makes recommendations to supervision in accordance with such discussions.
9. Ensures that maintenance work and special measurements are completed and documented properly.

10. Works with other classifications in the performance of their duties and performs any other duties as assigned within the Technician "B" classification and lower classifications.
11. Learns to operate engine emission analyzer tool and makes necessary adjustments to engine based on emission testing analyzer.

Qualifications:

1. Must have demonstrated ability in lower Compressor Station job classifications and duties and have the ability to lead, direct, instruct and to work with others to ensure proper completion of assigned work.
2. Must have demonstrated ability in operating the necessary vehicles, tools and equipment utilized by lower classifications and possess a working knowledge of all tools, measuring instruments, and electronic testing equipment.
3. Must be willing to work shifts and overtime and have a good work and attendance record.
4. Must have a valid vehicle operator's license.
5. Employees in the Compressor Technician "B" classification will be promoted to the Compressor Technician "A" after twelve (12) months if they have demonstrated the ability to perform all the duties associated with the Compressor Technician "B" position.
6. If after a period of one (1) year following promotion to this job classification, a Compressor Technician "B" fails to meet all of the qualifications for promotion to Compressor Technician "A", he/she will be reclassified and paid at the Compressor Operator "A" rate. Once reclassified, the employee must remain as a Compressor Operator "A" for a minimum of 12 months before being reconsidered for promotion to Compressor Technician "B."
